

# Earth Tub™ Pricing & Specifications

Effective June 2017

## The Earth Tub 9.0

Our latest Earth Tub design incorporates all of the features and benefits our customers have asked for!

- **Easy to mix!** The tub and lid design allows for easy turning of the mixing lid.
- **Protection against rain!** The lid has a sloped design to help it shed rain water and prevent rain from entering the Earth Tub.
- **No leachate requirements!** There is no need to dispose of leachate because its recycled back into the compost.
- **Easy to unload compost!** The Earth Tub has a large discharge door that provides better access to the interior of the Tub.
- **Easy to clean!** No more perforated floor. The smooth surface of the Earth Tub floor makes removing compost and cleaning easy .
- **Cool new look!** Enhanced structural design imparts a sleek, rugged aesthetic. The neutral colors look great in a variety of environments.
- **Year-round composting!** The Earth Tub is designed to operate outdoors and provide year-round composting capabilities, even in cold climates.\*

\* We recommend installing your Earth Tub(s) in a shaded or covered location to prevent long-term exposure to solar radiation and provide dry operating conditions in rain and snow.

### **1 Earth Tub™ Package - \$9,975.00 (USD):**

One Earth Tub™ Package provides all equipment required for a site to process up to 100 pounds of organic waste per day. For individual component pricing choose the custom package option.

This package Includes:

- Earth Tub™ LLDPE insulated plastic body and lid (89"x89"x72"/846 lbs. each):
  - 2Hp 3 phase totally enclosed fan-cooled (TEFC) auger motor (208/230/460V – 50/60 Hz)
  - In-line Helical Gearbox with UHMW support bearing
  - 12" stainless steel auger and track assembly
  - Optional leachate drain port
  - Locking discharge door and loading hatch
- One 36" hand-held temperature probe
- One Bio-Filter which includes an aeration blower and odor filter
- 2" aeration ducting and fittings to connect Bio-Filter to Earth Tub

### **2 Earth Tub™ Package - \$17,895 (USD):**

Two Earth Tub™ Package provides all equipment required for a site to process up to 200 pounds of organic electrical components (e.g., variable frequency drive).

This package includes:

- Two Earth Tub™ LLDPE insulated plastic body and lid (89"x89"x72"/846 lbs. each):
  - 2Hp 3 phase totally enclosed fan-cooled (TEFC) auger motor (208/230/460V – 50/60 Hz)
  - In-line Helical Gearbox with UHMW support bearing

### 2 Earth Tub™ Package (Continued):

- 12" stainless steel auger and track assembly
- Optional leachate drain port
- Locking discharge door and loading hatch
- One 36" hand-held temperature probe
- Two Bio-Filters (one for each Tub) which includes an aeration blower and odor filter
- 2" aeration ducting and fittings to connect Bio-Filter to Earth Tub

### 3 Earth Tub™ Package - \$26,975 (USD):

Three Earth Tub™ Package provides all equipment required for a site to process up to 300 pounds of organic

waste per day. With this option, all units need to be sited in the same location if there is a desire to share electrical components (e.g., variable frequency drive). This package includes:

- Three Earth Tub™ LLDPE insulated plastic body and lid (89"x89"x72"/846 lbs. each):
  - 2Hp 3 phase totally enclosed fan-cooled (TEFC) auger motor (208/230/460V – 50/60 Hz)
  - In-line Helical Gearbox with UHMW support bearing
  - 12" stainless steel auger and track assembly
  - Optional leachate drain port
  - Locking discharge door and loading hatch
- One 36" hand-held temperature probe
- Three Bio-Filters (one for each Tub) which includes an aeration blower and odor filter.
- 2" aeration ducting and fittings to connect Bio-Filters to Earth Tubs.

### Optional Features:

- **Earth Tub On-Site Set-Up, Installation or Tune-Up and Training – RECOMMENDED - \$2,500 (USD):**

Green Mountain Technologies comes on-site to install your Earth Tubs, start-up your compost process and train your staff. This fee includes one day on-site for one GMT representative. Additional on-site days are available at a charge of \$950/day. Normal travel expenses included (assuming a minimum of 2-week advance notice on reservations). The price is the same for 1, 2 or 3 Earth Tubs installed in the same location.
- **Earth Tub™ Positive Aeration System – RECOMMENDED - \$349.00 per Tub (USD):**

This recommended aeration system pushes air up through the compost, increasing oxygen levels, raising composting temperatures, speeding decomposition and preventing odors.
- **Earth Tub™ Variable Frequency Drive – RECOMMENDED - \$895.00 (USD):**

A VFD is required for sites that lack 3-phase power. We also provide a VFD starter for 3-phase electrical service at the same price. One VFD can be shared between multiple Earth Tubs that are installed in the same location.
- **Earth Tub™ On-Floor Heating System - \$299.00 per Tub (USD):**

This resistance cable heating system provides back-up freeze protection to the interior of the Earth Tub in case compost temperatures drop below (70 degrees F) during persistent freezing weather. This heater must be installed in concert with the Positive Aeration System above.
- **Additional 36" Temperature Probes - \$99.00 each (USD)**
- **One-Year Extended Warranty - \$395.00 per year (USD):**

Extended warranties are available on our parts-only warranty. Limit two additional years of warranty extension beyond the standard one-year warranty.

\*All prices listed do not include taxes, shipping or installation costs. Please contact us to receive a complete quote including shipping costs.
