

# Aerated Static Pile

## Cut Sheet

### Cost Effective

Up to 50% less footprint  
+ material handling cost  
than windrow facility

### Robust

Facilities still  
operating 30+ years  
after installation

### Odor Control

Up to 95% less odor  
and emissions than  
windrow facility

# Aerated Static Pile

## Specifications

With excellent emissions control, material handling efficiency, and finished product quality, it is no wonder that aerated static pile (ASP) composting has become the predominant means of composting putrescible waste in the United States. We have helped hundreds of customers build ASP facilities around the world, and offer a unique product line that can be easily integrated into farms, greenfield sites, or existing composting facilities.

FEATURES	Concrete Sparger	HDPE Sparger	Trench	Pipe on Grade
Capex	\$\$\$	\$\$	\$\$\$	\$
Opex	\$	\$	\$\$	\$\$\$
Working surface	Concrete or asphalt	Concrete	Concrete	Any
Suggested capacity	5,000+ T/year	2,000+ T/year	5,000+ T/year	500–25,000 T/year
Max pile length x width x depth	400' x any' x 12'	200' x any' x 12'	60' x any' x 12'	80' x any' x 12'
Aeration direction	Positive, negative, reversing	Positive, negative, reversing	Positive, negative, reversing	Positive, negative, reversing
Leachate generation	No discharge	No discharge	No discharge	No discharge
Emissions compared to windrow	80% to 95% less	80% to 95% less	80% to 95% less	80% to 95% less
Electricity	Single or three phase	Single or three phase	Single or three phase	Single or three phase
