oxygen cell

Oxygen Probes

Specifications

Keeping pile oxygen levels above 13% is critical to controlling odors and making high quality finished compost. Our OT probes integrate operators temperature and oxygen data in one reading. Simply insert the probe into the pile, pump air into the oxygen sensor, and record the reading from the LCD screen.

FEATURES

Oxygen range	0-99%
Temperature range	1-199 degrees F
Probe length	3-6'
Units	Celsius or Fahrenheit
Battery	9 volt alkaline
Weather resistance	NEMA 3
Response time	3 seconds
Calibration	Twist knob
Display	½ inch high digital LCD
Probe construction	⅜ inch stainless steel
Monitor construction	Steel and aluminum
Finish	Laminated vinyl
Contacts	Gold plated
Warranty	1 year
