HAULING

RECYCLING YARD

## Letter of Recommendation

To all,

Allwood Recyclers has been talking with Green Mountain Technologies for several years prior to teaming up with them to install our new ASP system at our composting facility. From the very beginning, Michael Bryan-Brown and Jeff Gage have been extremely helpful and willing to share their knowledge. They have helped guide us in the best way to move forward with our project even when there was no guarantee that they would be given the project. As an excavating and underground contractor, I have worked with a lot of engineering firms over the years that will not really help you until they have a contract to proceed. Green Mountain Technologies has proven their expertise and professionalism, and they are always just a phone call away and offer their assistance promptly.

Allwood Recyclers Inc. was an existing facility for over 20 years prior to working with GMT to design our ASP system. The drafting engineers, Michael Bryan-Brown and Jeff Gage, would have conference calls with me while looking at their vimeo and going over the design. I was very impressed with how they worked with our challenges and made adjustments to their design to make everything work for our facility. I have been very happy with the level of communication from their staff during the construction phase of our project. I have enjoyed working with the GMT team and would recommend them to anyone looking for a composting system design.

Sincerely,

Mark Wubben

Vice President of Allwood Recyclers Inc.
